

Asking the Right Questions, Getting the Right Answers: Evaluating Young Children for Special Education Services

Self Assessment Measures for Early Childhood Evaluation Teams

This section provides self-assessment measures from which early childhood evaluation teams and families can gauge current assessment practices. The first measure was designed for school staff to look closer at the match between the DEC Recommended Practices in Assessment with current practice. The second measure “Family Perspectives: Improving Information Sharing with Teams” was designed for parents wishing to provide input on their own experience in the evaluation/assessment process.
