

## Child Outcome Guiding Questions From My Child's Story

These questions can be used to guide the discussion with the family from the initial contact through the completion of the assessment for service planning. This is not intended to be comprehensive, and not all statements will apply to all children. Familiarity with child development is necessary in order to understand the statements and how to apply them to each child and family. Refer to the "Typical Development" section of this Child Outcomes Booklet for an overview of child development from birth to three.
